

Safety Stair Nosing and Tread Plates

Stairs, platforms and walkways take an extreme amount of concentrated traffic on a daily basis. It is little wonder that these same areas provide the greatest risk of slips, trips and falls. With Antiskid Safety Stair Nosing and Tread Plates, tread stability is greatly improved and injury risk to staff and visitors is considerably reduced.

Antiskid Stair Nosing and Tread Plates are manufactured at our premises in a variety of colours, textures, shapes and sizes. Antiskid provide FREE on the site assessment that will guarantee the best solution for every situation and environment.

Product Description

High solids epoxy resin system, embedded with high friction aggregate, applied to your choice of quality steel based plates. Finished surface provides excellent chemical and abrasion resistance.

Features

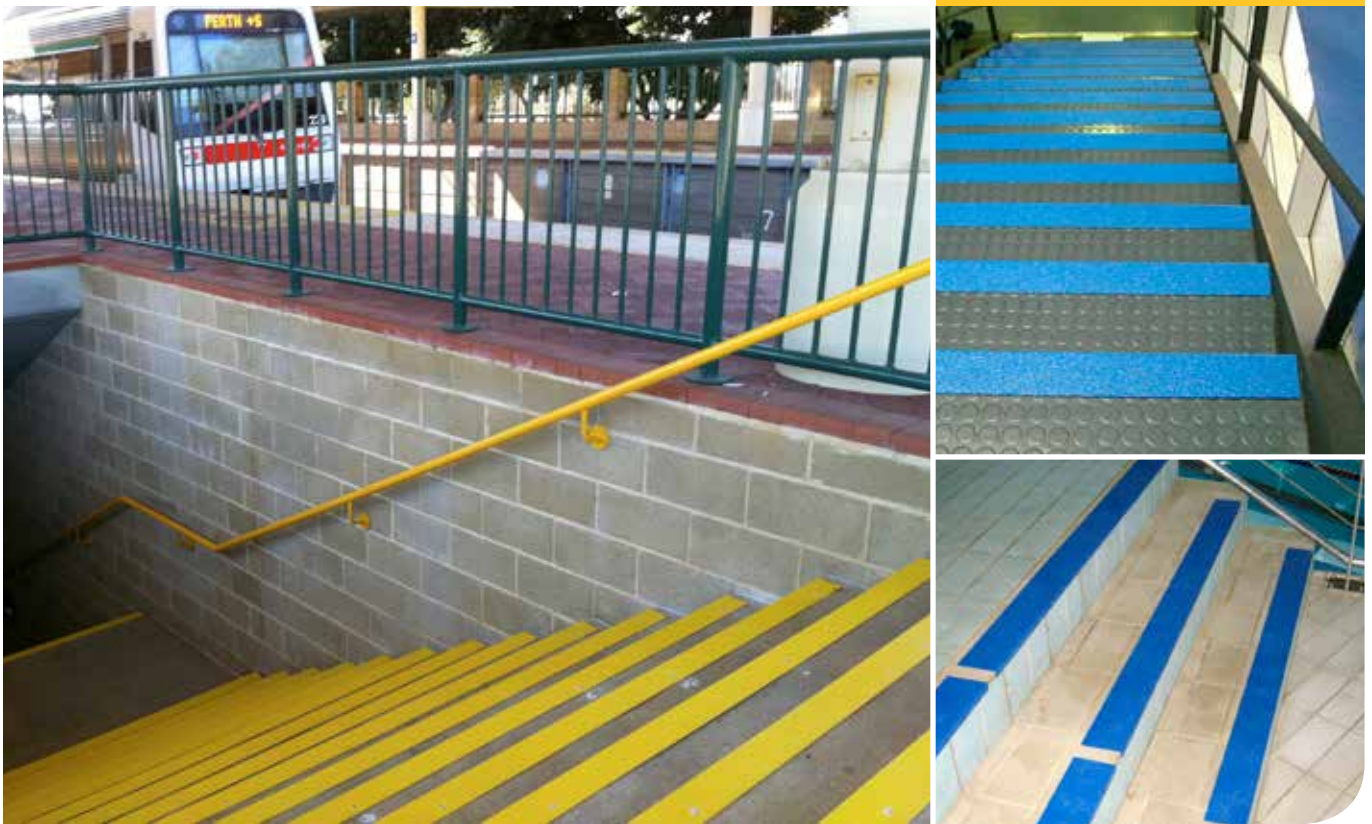

- High gloss finish that is easy to clean
- High chemical resistance
- Selection of corrosion resistant base plates
- UV resistance
- Range of safety and architectural colours
- 90 return to highlight and protect leading edge step
- Range of textured surfaces to suit every application
- Mechanical or adhesive fixing
- Custom designed service available

Prompt and Efficient Service

Antiskid Floor Safety Division includes mobile service vehicles covering the metro area. All our applicators are fully trained in our products and customer service.

We pride ourselves on providing fast and thorough service. Regional applications by appointment.

Safety Stair Nosing and Tread Plates

Stair nosing applied to existing stairs increases tread stability and reduces the risk of injury significantly.

Applications

Concrete stairwells | Ladders | Cool rooms and freezers | Gantries and walkways | Steel flooring | Metal steps and staircases | Building fire escapes | Mobile and portable equipment | Trucking and forklift steps | Boating marine | Building entry and public accesses | Demarcation areas | Damaged step edges | Oil and grease soaked workstations and many more.

Antiskid range of stair nosings comply with the following:

- Building Code of Australia (BCA)
- National Construction Code (NCC)
- AS/NZ Standard 1428.1: 2009 - Design for access and mobility - General requirements for access – New building work
- AS/NZ Standard 1428.2: 1992 - Design for access and mobility - Enhanced and additional requirements - Buildings and facilities
- AS 4586: 2013 - Slip resistance - Slip resistance classification of new pedestrian surface materials
- AS 4663-2013 - Slip resistance measurement of existing pedestrian surfaces

Other Antiskid Floor Safety Solutions available
