

Protective Car Park and Vehicle Traffic Decking Systems

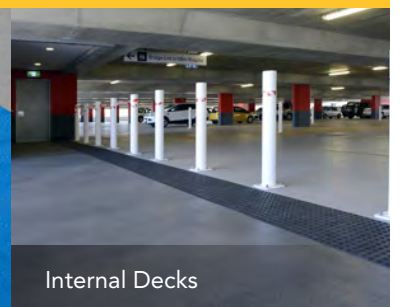

Hi Friction Ramps

Exposed Decks

Demarcation

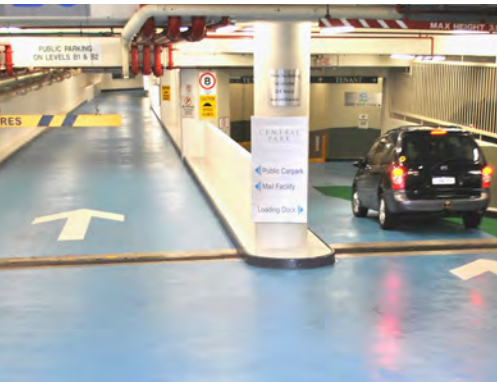

Internal Decks

Antiskid Industries has built a strong reputation for supplying and installing a unique range of performance decking products to commercial and private car park environments and high trafficking decks:

- ➔ Cutting edge, technologically advanced solutions for protecting Car Park structures to minimize maintenance, and operational and life cycle costs
- ➔ Protection from extreme weather conditions including waterproof surface
- ➔ Exceptionally hard wearing, with high durability and abrasion resistance, allowing it to stand up to heavy traffic, fuel and chemical spillage.
- ➔ A variety of profiled anti-skid finishes available plus safest solution for under foot
- ➔ Excellent aesthetics, with a wide variety of crack bridging colours and styles available to create eye catching, light reflective finish
- ➔ Rapid cure application with early return to service with minimum downtime and disruption
- ➔ Reduces tyre squeal
- ➔ High fire rating

Protective Car Park and Vehicle Traffic Decking Systems

Multi-Storey car parks

Cosmetically enhance and reduce noise and makes multi-storey car parks and suspended floors brighter and safer environments to visit. Product is ideally suitable for refurbishment of existing car parks or new construction projects. Also offers a colourful, watertight, hard wearing surface for intermediate decks of multi-storey car parks

Benefits

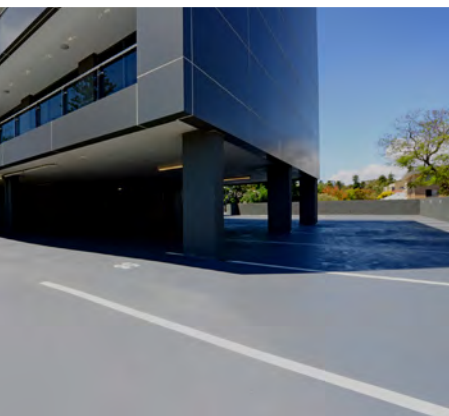

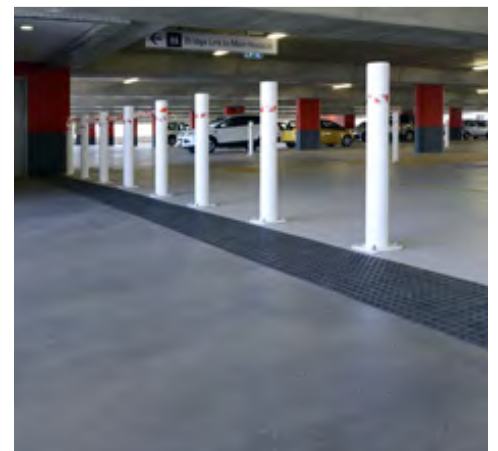

- Hard wearing
- Abrasion resistant
- Fire resistant
- Slip resistant
- Excellent bond strength

Exposed decking

Flexible solvent-free polyurethane car park deck coating system. It offers a colourful crack bridging, waterproof wearing surface for multi-storey and exposed deck car parks. Cosmetically enhances and reduces noise, making car parks lighter, safer environments to visit. It is suitable for refurbishment and on new construction projects.

Benefits

- Slip resistant
- Aesthetically attractive
- Light reflective surface for safer environment
- Reduces noise – greatly reduces tyre squeal
- Hard wearing and abrasion resistant
- Waterproof and crack bridging
- Fast track installation
- Excellent chemical resistance to engine oil, battery acid, hydraulic fluid, fuel

Commercial or privately-owned car parks

Solvent-free protective coating ideally suited to intermediate or underground decks with commercial or privately-owned car park environments. It offers a flexible polyurethane trafficable and waterproof coating which produces a dynamic, colourful and safe car park. It has excellent bond strength and fast track installation.

Benefits

- Green Label certificated
- Aesthetically attractive
- Reduces noise – greatly reduced tyre squeal
- Excellent chemical resistance
- Fire resistant
- Slip resistant
- Resistant to hair line cracking
- Fast track installation
- 100% UV light stable – non yellowing

High frequency traffic flooring

Methyl methacrylate decking coating system provides a colourful watertight, hard wearing surface for high trafficable decking. It enables fast track application, dramatically reducing program time. Ideally suited where there's high frequency usage that requires fast curing for next day usage, such as, sporting venues, car parks, public areas, shopping centres, walkways and service corridors.

Benefits

- Fast curing and rapid installation
- Aesthetically attractive
- Hard wearing
- Abrasion resistant
- Can be used over existing asphalt substrates
- Slip resistant
- Fire resistant
- Excellent bond strength
